AGRI-FLEX™ 325 Bentonite

Description
AGRI-FLEX™ 325 is a natural 325 mesh high purity Wyoming sodium bentonite. It is used as a binder and rheological modifier. It has application that aids in pellet binding in fowl and animal feed pellet production. It will insure tougher more durable pellets. It aids in the free movement of pellets to prevent lumping and caking. Research has been conducted which indicates that bentonite used in the feed slows the digestive system and enables the fowl or animal to better utilize the feed nutrients.

Applications/Functions
- Aids in pellet binding for animal feed pellet production

Advantages
- Insures tougher more durable pellets
- Increased flowability of pellets
- Aids in prevention of lumping and caking
