

Description AGRI-FLEX™ PREMIUM is an engineered high yield 200 mesh Wyoming sodium bentonite. It is used as a binder, stabilizer, suspension agent, and rheological modifier. It has application that aids in pellet binding in fowl and animal feed pellet production. It will insure tougher more durable pellets. It aids in the free movement of pellets to prevent lumping and caking.

Applications/Functions

- Aids in pellet binding for animal feed pellet production.

Advantages

- Insures tougher more durable pellets.
- Increased flowability of pellets.
- Aids in prevention of lumping and caking.
